overcome.**

BT

**Australia-wide
can do.**

DAY-TO-DAY MONITORING AND ASSESSMENT

At BT Transport & Logistics, our focus on Safety and Compliance is an essential part of our day to day operations. With the increase in today's gross vehicle load capacity our average load can easily weigh 80 or 90 tons and travel from the east coast to the west coast of Australia, often covering many kilometres of remote unsealed 'tracks'. Continually assessing and monitoring our activities and our people is our priority. We start by ensuring our workforce is kept up to date with Training and Supervision. New Drivers are monitored closely for work diary compliance and their general attitude to a safe efficient work procedure. Verification of Competency (VOC) tests are carried out as well as Safety Performance Inspections to ensure our Drivers and load staff are competent. Regular medical examinations and random drug and alcohol testing give us peace of mind that our Long Haul Drivers are fit for duty.

SAFE LOAD RESTRAINTS

Restraining the massive unpredictable loads we carry is paramount to our business. Following the 80/50/20 rule as set out in the Load Restraint guide 2004 edition we begin by restraining 80% of the loads weight to prevent it moving forwards, 50% of the loads weight is prevented from moving backwards and sideways and 20% of the loads weight is prevented from moving upwards. We use varying methods to chock up equipment depending on whether it has rubber tyres or metal tracking. We restrain high loads, wide loads and long loads, all the while ensuring bearers and bolsters, chains and ratchets or strapping doesn't cause injury to our employees or damage our freight.

FATIGUE MANAGEMENT

Fatigue Management is naturally of primary concern to us and we have several procedures in place to identify and prevent fatigue. We provide an extensive training session at Induction, relating to realizing the signs of fatigue and measures to control the situation to prevent an incident. We also regularly provide interesting and relevant information to remind our workforce, the danger working while fatigued can cause.

IT SOLUTIONS

Logchecker and Fleetminder are two web based programs we use to manage fatigue. Logchecker allows us to check start, stop and break times and is a quick and easy exercise to check for breaches of standard driving hours. Drivers are provided with a safe driving plan to reduce their exposure to the risk of fatigue. Alerts for driver's license and medical expiry reminders, as well as non-conformance and corrective action reports can also be generated by Logchecker. Fleetminder gives us the ability of GPS

BT - Can Do.

INNOVATIVE DISTRIBUTION SOLUTIONS, DRIVEN BY SERVICE

The BT Group is a proudly family-owned business with over 45 years of experience in the Australian Transport and Logistics Industry. We are a well-established national logistics provider with direct access to depots located in all capital cities and major provincial towns.

Safety & Compliance always our priority

tracking. To safeguard our staff and assets we can remotely immobilize a vehicle, receive an alert via a mobile phone or activate an alarm remotely, using a simple SMS command. We can receive reports which alert us to harsh braking, harsh accelerating and speeding. Fleetminder is also able to send crash sensor alerts to Head office as well as fuel level sensor monitoring.

MAINTENANCE & INSPECTIONS

Vehicle inspections and a Top Notch Maintenance Department ensure our fleet of late model trucks is constantly monitored for roadworthiness and compliance to National Heavy Vehicle Law. The Translogix computer program we use gives us live tracking on all equipment which includes notification when equipment hasn't moved for a 24 hour period. Spreadsheets and reports are easily generated to provide real time updates of vehicles location. The workshop maintenance system provided by Translogix generates notification when a vehicles is due for any checks which prevents issues arising.

CREATING A SAFE WORK ENVIRONMENT

Ultimately we are all drawn to our business through the appreciation of the might and ability of the heavy vehicle industry and a desire to provide our customers with impeccable efficient service. The safety and compliance measures we have in place at BT Transport & Logistics ensure we are doing everything possible to protect our employees from injury or illness and create a circle of continuous improvement for the future.
